Geosystems Hellas News and Updates

ISSUE December 2024

Editorial

You have in front of you the last issue of Geosystems Hellas Newsletter for 2024.

I was asked from my team, as CEO, to write about the highlight of this year. Well first thing in mind was the 15 year business anniversary of Geosystems Hellas, since its founding in 2009. Yet, there is something bigger from all of us that took place in 2024 in the Earth Observation Industry in Greece: after the 2023 opportunities with the cubesats (HELIOS & SELENE), this year under the ESA AXIS 3 we have signed the SAT4GAIA contract as Prime and the SAT4Forest as Co Prime as part of the National Space Program.

Last but not least, recently we signed the first InCubed contract for Greece, the "The Golden Twins", and this is of significant importance for all of us and for Greece since DT services are integrating EO and non-EO data to deliver fit-for-purpose solutions.

2024 was a good year for Greece in the space sector. Let's wish for 2025 to be an even brighter year for Space Industry with Greece at the forefront of innovation and excellence in all departments. Merry Christmas to all and a Happy New Year! Let's all enjoy 2025!

New Contracts

Greek National SmallSat Programme

Geosystems Hellas signed two contracts with European Space Agency under the National Satellite project AXIS -3 at a special ceremony organized by the Ministry of Digital Governance.

ESA official announcement

ESA InCubed programme

Geosystems Hellas was awarded the first **ESA InCubed** activity in Greece. "The Golden Twins" aims to establish a system-agnostic, multi-mission hosting Earth Observation (EO) platform addressing the unique challenges of Greece's islands. Focused on forest fire monitoring, extreme precipitation events, and maritime safety, the platform provides real-time high-resolution data-driven insights to enhance disaster preparedness, decision making, rapid response, and environmental protection. See more details on the project [here](#).

THE GOLDEN TWINS

Innovation

During the last 3 months Geosystems Hellas had a productive time with several Kick Off meetings: BorderForce, THEIA, Aurora are the projects that got successfully launched during past months.

BorderForce

Aurora

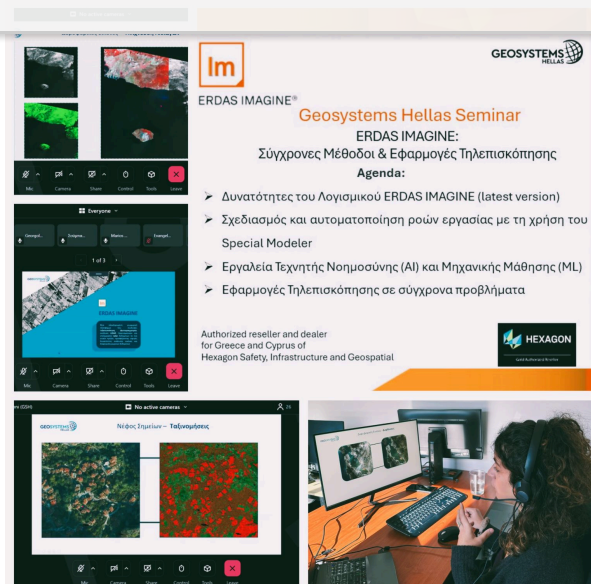

Events

Geosystems Hellas team participated in various most exciting events all over Europe.
Indicative:

Thessaloniki International Fair, Thessaloniki
INTERGEO Expo, Stuttgart
International Austrological Congress, Milan
Space Tech Expo Europe, Bremen
EO Commercialization Forum, Frankfurt
ESA Industry Space Days, Noordwijk
HETIA Emerging Tech Forum, Athens

ERDAS Imagine Seminars

Geosystems Hellas, authorized reseller and consultant of Hexagon Safety, Infrastructure & Geospatial in Greece and Cyprus, during November and December, designed and organized three 2-hour seminars on updates and new features of ERDAS imagine. Title of the Seminar was “Modern Methods and Applications in Remote Sensing” with participants from multinational corporations, organisations and greek public sector. See more info [here](#).

GSH new “home”

November was a milestone month for Geosystems Hellas, as the company entered into new private owned offices! GSH operates from three different locations now, two in Athens city center and from a branch in Herakleion, Crete.

15 Year Anniversary

2024 marked for Geosystems Hellas the 15th anniversary since its founding in 2009. Geosystems Hellas celebrated this milestone with a memorable corporate party along with dear friends.
